**Difficulty:**
6/10

**Problem:**
Adam from Versa Business Intelligence Team would like a script to fetch crypto currency data from RapidAPI.com. He needs to get BTC, ETH and XRP data with the latest price in Ringgit Malaysia and exchange rate in it.

**Solution:**
Write a NodeJS script fetch BTC, ETH and XRP latest data from
[https://rapidapi.com/alphavantage/api/alpha-vantage](https://rapidapi.com/alphavantage/api/alpha-vantage) then console.log the JSON result as following:

```
[
        {
                symbol: "BTC",
                priceUSD: "23398.48000000",
                priceMYR: "104123.23600000",
                rateUSDMYR: "4.45",
                date: "2022-07-20"
        },
        … 2 other objects
]
```

**Remarks:**
Please push to Github with README.MD containing step by step instructions on how to run the script.
